

Multi-Line Insurance Policy and Claims Management System

1.INTRODUCTION

The Multi-Line Insurance Policy and Claims Management System is a Salesforce-based application designed to manage different types of insurance policies and claims through a centralized platform.

Insurance companies handle multiple insurance products such as Life Insurance, Health Insurance, Motor Insurance and Property Insurance. Managing customer details, policy information, premium payments and claims manually or through separate systems can make the process difficult and time-consuming.

The proposed system provides a centralized platform to manage customers, insurance products, policies, claims and payments efficiently. Salesforce Objects, Flows, Reports, Dashboards and AgentForce AI are used to automate processes and provide quick access to insurance-related information.

The system also provides AI-based assistance through AgentForce AI, which can help users retrieve policy details, claim status, premium information and other insurance-related information.

2.IDEATION PHASE

2.1 Problem Statement:

PS	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	Insurance Operations Manager	standardize policy quoting and issuance	the process is manual, slow, and inconsistent	legacy systems and processes are fragmented	frustrated and concerned

PS	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-2	Insurance Agent	create and manage policies efficiently	different insurance lines require different information	Vehicle, Property, and Life policies have diverse data requirements	overwhelmed
PS-3	Insurance Agent	provide accurate policy quotes	quoting requires multiple steps and manual processing	there is no unified quoting platform	frustrated and uncertain
PS-4	Claims Manager	manage claims efficiently	claim review and routing are largely manual	claims processes are not centralized or automated	stressed
PS-5	Claims Adjuster	manage assigned claims effectively	I lack a focused view of my claims workload	claim information is not easily available in one place	frustrated and less productive
PS-6	Claims Manager	route claims to the appropriate team	claims need to be handled according to policy type and claim severity	routing processes are complex and require automation	concerned about delays
PS-7	Senior Adjuster	process high-value claims efficiently	approval requires multiple levels of review	high-value claims require structured approval and escalation	pressured
PS-8	Insurance	maintain	different	Vehicle,	concerned

PS	I am (Customer)	I'm trying to	But	Because	Which makes me feel
	Operations Manager	accurate policy information	products require different fields and validations	Property, and Life policies have varying data requirements	about data quality
PS-9	Customer	get my policy and claim handled quickly	manual processing causes delays	policy and claims processes are fragmented	uncertain and dissatisfied
PS-10	Insurance Management	get a complete view of customer, policy, and claim information	information is spread across processes and systems	there is no unified platform	concerned about operational efficiency

2.2 Empathy Map Canvas:

User Persona: Insurance Claims Adjuster

- Think & Feel: Concerned about claim delays and workload
- Hear: Customer and team concerns about claim resolution
- See: Multiple claims, policy details, and approval statuses
- Say & Do: Reviews claims and follows up on approvals
- Pain: Manual processing, complex routing & limited visibility
- Gain: Claims dashboard, automation & faster approvals

2.3 Brainstorming & Idea Prioritization:

Ideas Considered

- Manual Registers – Policy and claim information maintained manually
- Spreadsheet Tracking – Policies, claims, and approvals tracked using spreadsheets
- Standalone Portal – Separate portal for policy and claim management
- Salesforce CRM – Unified platform for policies, claims, automation, and reporting

Final Selection

Salesforce CRM selected due to:

- Automation – Automates quoting, premium calculation, claim routing, and approval processes
- Scalability – Supports multiple insurance lines including Vehicle, Property, and Life Insurance
- Real-Time Visibility – Provides centralized visibility into customer, policy, and claim information
- Unified Platform – Brings policy and claims processes together in one system
- Improved Efficiency – Reduces manual processing and supports faster claim handling
